PROFESSIONAL SUMMARY

Results-driven Software Developer with 3+ years of experience designing and delivering high-performance fintech and banking applications. Specialises in scalable web solutions using C#, ASP.NET Core, Angular, and React, with deep expertise in remittance workflows, CBS integrations, and secure API orchestration. Proven track record of implementing complex financial system features including RBAC, 2FA, and AES-encrypted payment integrations. Committed to clean code principles, agile methodologies, and measurable business outcomes.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, SQL

Frameworks & Libraries: ASP.NET Core, MVC, Angular, React, Entity Framework Core

Databases & ORM: PostgreSQL, SQL Server, Dapper

APIs & Integrations: REST, SOAP, CBS APIs, BNB Integration, AES Encryption, Request Signing

Security: RBAC, JWT, OAuth 2.0, Two-Factor Authentication (2FA), Maker/Checker

Tools & Platforms: Git, Jira, Visual Studio, VS Code

Methodologies: Agile / Scrum, Clean Architecture, SOLID Principles

PROFESSIONAL EXPERIENCE

Software Engineer

Fintech Solutions Pvt. Ltd., Kathmandu, Nepal | July 2025 – Present

- Designed and implemented transaction document verification workflows and built middleware for BNB CBS API integration.
- Engineered a granular Role-Based Access Control (RBAC) module with real-time enforcement across ASP.NET Core APIs and React-based UI.
- Delivered AES-encrypted collection API integration with request signing for real-time fund collection on the Flash Payments platform (Australia).
- Managing multi-country system updates for ISend (Australia, Singapore, USA), leading refactoring of legacy services to improve performance and scalability.

Software Engineer

Inficare Pvt. Ltd., Kathmandu, Nepal | October 2022 – July 2025

- Developed biometric device integrations for web applications and connected partner SOAP/REST APIs for the RemitX remittance platform.
- Built Web APIs for Bank CBS communication and optimised SQL queries to meet ISO field requirements for the MDX system.
- Implemented Two-Factor Authentication (2FA) and Maker/Checker approval workflow security features for the Krishi project.
- Refactored legacy codebase and SQL queries using Dapper, delivering measurable improvements in application performance.
- Awarded Marvellous Multitasker 2023 by Inficare Pvt. Ltd. for outstanding delivery across multiple simultaneous projects.

Junior Software Developer

Imark Pvt. Ltd., Kathmandu, Nepal | February 2022 – October 2022

- Developed a full-stack .NET Core and Angular application (IPOS / BankPortal) to manage end-to-end POS device lifecycles for banking clients.
- Implemented bulk data entry via Excel import functionality and optimised legacy SQL query structures, reducing load times.

KEY ACHIEVEMENTS

- Marvellous Multitasker Award 2023 — Recognised by Inficare Pvt. Ltd. for sustained excellence and delivery across multiple concurrent projects.
- Flash Payments Integration — Delivered real-time AES-encrypted fund collection API for the Australian market on an aggressive timeline.
- Multi-Country ISend Rollout — Led system updates across Australia, Singapore, and USA, improving cross-border service reliability.
- CBS API Middleware — Built robust middleware for BNB Core Banking System integration, enabling real-time transaction verification.

EDUCATION

Bachelor of Information Management (BIM)

Orchid International College, Gaushala, Kathmandu

+2 Science

Balmiki Providence, Jhapa

Grade: 75%

School Leaving Certificate (SLC)

Bright Future English Secondary School, Jhapa

Grade: 76%
