

Issues in Payroll System:

- 1) Modal popup doesnot have scrollable for items to add. Also Show the calculated Gross salary above in modal header to show.

Rule of SSF, CIT Deduction:

1. Social Security Fund (SSF)

The SSF is a **mandatory, contribution-based system** for registered employers and employees in Nepal. [\[1\]](#)

- **The Formula:** It operates on a **31% formula based strictly on your Basic Salary** (excluding allowances like fuel or food). [\[1, 2\]](#)
- **The Split:**
 - **Employee Share (11%):** Deducted directly from your monthly gross pay.
 - **Employer Share (20%):** Paid by your company as an additional cost on top of your salary. [\[1\]](#)
- **Tax Benefit:** Enrolling in the SSF **waives the standard 1% Social Security Tax** on your first income tax bracket. [\[1\]](#)
- **The Coverage:** The collected amount is split internally into medical insurance, accident coverage, dependent benefits, and an old-age pension fund. [\[1, 2\]](#)

2. Citizen Investment Trust (CIT)

Unlike the SSF, the CIT is an **optional, user-defined investment/savings tool**. [\[1\]](#)

- **The Formula:** There is no fixed percentage. You choose a specific monthly amount (e.g., NPR 5,000) or a custom percentage to be deducted from your check. [\[1, 2, 3, 4\]](#)
- **The Split:** This is fully funded from your own pocket as an employee deduction. [\[1\]](#)
- **The Benefit:** It operates purely as an investment engine that grows with accumulated interest, retrievable as a lump sum upon retirement or leaving a job. [\[1\]](#)

The screenshot displays a software interface for managing employee salary components and deductions. The top bar shows the date '2026-07-01', the employee type 'Individual', and a user profile 'Ankit Chamlagain'. Below this, there are two main sections: 'Components' and 'Deductions'.

Components Table:

CODE	VALUE	AMOUNT	FREQUENCY	TAXABLE	RETIREMENT	REMOVE
BASIC	Rs 20,000.00	Rs 20,000.00	Monthly	Yes	—	
DEARNESS_ALLOWANCE	Rs 200.00	Rs 200.00	Monthly	Yes	—	
OTHER_ALLOWANCE	Rs 20,000.00	Rs 20,000.00	Monthly	Yes	—	
SSF_CONTRIBUTION	11%	Rs 2,200.00	Monthly	—	—	
COMMUNICATION_ALLOWANCE	Rs 500.00	Rs 500.00	Monthly	Yes	—	
TRAVEL_ALLOWANCE	Rs 1,500.00	Rs 1,500.00	Monthly	Yes	—	

Below the table, there are input fields for 'Code', 'Type' (Fixed), 'Value', 'Frequency' (Monthly), 'Taxable' (checked), and 'Ret.' (unchecked).

Deductions Table:

CODE	VALUE	AMOUNT	FREQUENCY	RETIREMENT	REMOVE
SSF_DEDUCTION	21%	Rs 4,200.00	Monthly	Yes	

Below the table, there are input fields for 'Code', 'Type' (Fixed), 'Value', 'Frequency' (Monthly), and 'Retirement' (checked).

Here SSF contributed amount is also deducted. Add a ConfigType and Config to Set SSF deduction percentage like this: EmployeeShare (11%) and EmployerShare (20%) .

Now there should be a salary calculation Feature module for HR. Now salary should be calculated on the basis of NetPayment, GrossPayment or CTC. This will help to structure the salary of Employee.

Now payroll run should have refresh feature to update if anything is updated. Also details show 0 in UI too.

Run Detail

Shrawan — FY-SAMPLE

Draft

Approve

Cancel Run

Slips: 1

Remarks: Report Generation

Gross Earnings

Rs 41,980.00

Net Pay

Rs 41,593.33

Salary Slips

Open a slip to review and adjust its lines, or cancel it individually for a leaver.

EMPLOYEE	PAY DAYS	UNPAID LEAVE	GROSS EARNINGS	DEDUCTIONS	NET PAY	STATUS	ACTIONS
Anita Shrestha EMP2026006	30	0	41,980.00	386.67	41,593.33	Draft	

Also, this modal popup for entry is not appropriate for scrollable. Also, the entry box is not appropriate here:

Entry should be:

Also I’ve created new fiscal year with different salary tax slabs:

Fiscal Years

Payroll tax years and their income-tax slabs — separate from the school's academic year

+ New Fiscal Year
